

Veterinary - Front Line Demonstration

2025-26

1. Demonstration of multi crop 10 cent fodder production model to enhance milk production.
2. Demonstration of formulated concentrate feeding on production and productivity performance of milch animals
3. Demonstration of scientific manage mental strategies in prepubertal heifers to curtail delayed sexual maturity
4. Demonstration of efficiency of coated vitamins and chelated trace minerals in improving the reproductive efficiency of dairy cattle.

2024-25

1. Diagnosis and management of subclinical mastitis using SFMT reagent
2. Demonstration of multi crop 10 cent fodder production model to enhance milk production.
3. Area specific mineral mixture as feed supplement in milch animals
4. Demonstration of feed supplementation of bypass fat in dairy animals
5. Demonstration of two doses of PGF2 alpha injection with 14 days interval

2023-24

1. Demonstration of CoFS 31 fodder
2. Demonstration of area specify mineral mixtures
3. Demonstration of surf field mastitis agent
4. Demonstration of different feeding methods
5. Demonstration of double PGF 2 alpha

2022-23

1. Demonstration of multi cut fodder sorgham variety CoFS 31
